A NEW WAY TO GAIN AN OLD END. From The Washington Post.

From The Washington Posi.

An unprincipled scamp recently played a game upon a Washington restaurateur that for originality and effectiveness has not been marched in any of the time-honored stories of Beau Hickman, or other "eaters of dinners, you foot the bills," He was a well-dressed, gentlemanly appearing personany other would not have secured much attention in the cafe which he worked—and he ordered a dinner that proclaimed him an epicure, if a seoundred, He commenced by tipping the waiter liberally, which alone would proclaim him one accustomed to secure the best of attention; and as for wines, he would have none but the beat vintages, which he picked with the taste of a connoissaur. The dinner was prepared to the king's taste, and appeared to please him until the last course. At functionary not being sufficient to vent his wrath upon, he summoned the head waiter, and eventually the proprietor. Then he pointed out the cause of the trouble—a dead fly in the dessert. Words could not express his well-feigned disgust, or the regret of the proprietor at this unfortunate occurrence. The cook was called up and "roasted" more effectually than he ever did bis mears, and the restaurateur offered every amend in his power. But the guest professed to be almost overcome with naussa, and could not eat any more—he had probably had all he wanted. Of course, the proprietor could not had was only too thankful that the matter should escape the attention of his other guests. But when the disgusted guest had gone, a bystander, who had watched the occurrence, remarked to the proprietor: "Why, didn't you see him put that the nuffice outsile and the dessert." And the subsequent conversation was unfit for publication.
